OBJECTIVE

Game programmer and graduate of Vancouver Film School's one-year game programming course, experienced in Unreal Engine (C++/Blueprints) and Unity. Specialized in creating immersive gameplay systems and AI behaviors, with a strong passion for working in collaborative, dynamic teams to deliver polished, high-quality games.

EDUCATION

Vancouver Film School

Game Programming Diploma (Honours) | 2024-2025

Courses include C++, C#, gameplay architecture, performance optimization, Git

EXPERIENCE

Programmer | Final Project | [Sweet Spot Itch.io](https://sweet-spot-itch.io)

Mar/2025 - Aug/2025

- Built gameplay systems and AI for a 3D puzzle-horror game in C++ using Unreal Engine.
- Debugged gameplay systems using Unreal Insights and engine profiling tools.
- Worked in a 6-person Agile team using Git, iterating on features through feedback and testing.

Programmer | Team Project

Nov/2024 - Feb/2025

- Implemented player mechanics and enemy interaction systems supporting stealth gameplay loops
- Performed manual testing to validate gameplay behavior, edge cases, and performance
- Logged, tracked, and resolved issues during iterative development cycles with team members

HARD SKILLS

- **Languages:** C++, C# (Object-Oriented Programming), JavaScript
- **Engine & Frameworks:** Unity (Animation Systems, NavMesh), Unreal (Blueprint, Physical animation)
- **Tools & Version Control:** Unity Profile, Unreal Insights (Debugging & Profiling), Git

SOFT SKILLS

- Remote Collaboration
- Time Management
- Attention to detail
- Iterative development
- Debugging
- Technical communication

ACTIVITIES

Prototyped core multiplayer gameplay including player movement, interactions, and local hosting. Explored client server synchronization and iterated mechanics to improve responsiveness.
