Portfolio: [haneul.github.io/HaneulPortfolio](https://haneul.github.io/HaneulPortfolio)

## OBJECTIVE

I recently graduated from VFS, a one-year Game Programming diploma program with a solid foundation in C++ and c#, object-oriented design. Quick learner with experience collaborating in teams and adapting to new technologies. Passionate about delivering polished games with smooth, responsive gameplay.

## EDUCATION

Vancouver Film School

Game Programming Diploma | 2024-2025

Courses include Programming for Games, Web, and Mobile Education (Unity, Unreal Engine, C#, C++, Git)

## EXPERIENCE

Programmer | Final Project

Mar/2025 - Aug/2025

Developed a disappearing enemy mechanic in a 3D horror game using C++ and Unreal Blueprints, based on player line-of-sight. Built teleportation puzzle doors with smooth visual effects. Collaborated with a 6-person team using GitHub for version control.

Programmer | Team Project

Nov/2024 - Feb/2025

Created AI patrol and player vision-based state changes for a 2D stealth game in Unity. Participated in planning, prototyping, and debugging in a 5-person team.

## HARD SKILLS

- **Languages:** C++, C#, Python, JavaScript, HTML, CSS
- **Engines & Frameworks:** Unreal, Unity (Mirror), Vue
- **Tools & Version Control:** Unreal Insights, Unity Profiler, Git, GitHub, Fork, Rider, Visual Studio

## SOFT SKILLS

- Problem-solving
- Time Management
- Active Listening
- Finding Problems
- Remote Collaboration
- Working Hard

## ACTIVITIES

Prototyped a multiplayer game in Unity using Mirror, implementing player movement, interactions, and local hosting. Explored client-server synchronization and iterative gameplay tuning.
