OBJECTIVE

Recently graduated from VFS, a one-year Game Programming diploma program with a solid foundation in C++ and C#, object-oriented design. Quick learner with experience collaborating in teams and adapting to new technologies. Passionate about delivering polished games with smooth, responsive gameplay.

EDUCATION

Vancouver Film School

Game Programming Diploma (Honours) | 2024-2025

Courses include C++, C#, Unity, Unreal Engine, Git

EXPERIENCE

Programmer | Final Project | [Sweet Spot Ltch.io](https://sweet-spot-ltch.io)

Mar/2025 - Aug/2025

Implemented modular gameplay systems for player interaction and exploration in a 3D first-person project. Exposed C++ systems to Blueprints for rapid iteration and optimized performance using Unreal Insights in a 6-person team.

Programmer | Team Project

Nov/2024 - Feb/2025

Built AI perception and decision systems for a 2D stealth game, including enemy awareness states and player feedback mechanics. Iterated on gameplay features through playtesting and collaborated on a 5-person team using Git.

HARD SKILLS

- **Languages:** C++, C# (Object-Oriented Programming), JavaScript
- **Engines & Frameworks:** Unity (Animation Systems, NavMesh), Unreal (Blueprint, Physical animation)
- **Tools & Version Control:** Unity Profile (Debugging & Profiling), Git

SOFT SKILLS

- Problem-solving
- Time Management
- Attention to detail
- Iterative development
- Remote Collaboration
- Receiving and applying feedback

ACTIVITIES

Prototyped core multiplayer gameplay including player movement, interactions, and local hosting. Explored client-server synchronization and iterated mechanics to improve responsiveness.
